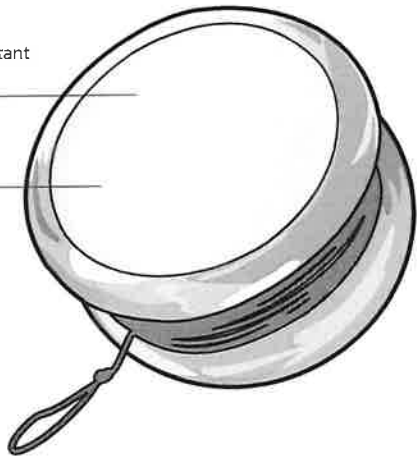
Specialty Selection Yo Information

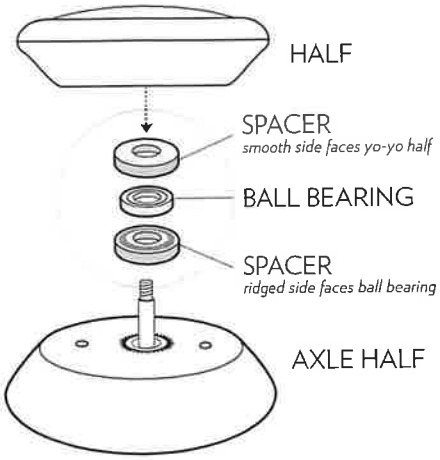
Features

Professional Ball Bearing Yo-Yo



- Twist apart *(for knot removal)*
- Steel ball bearing *(for friction reduction)*
- Six parts

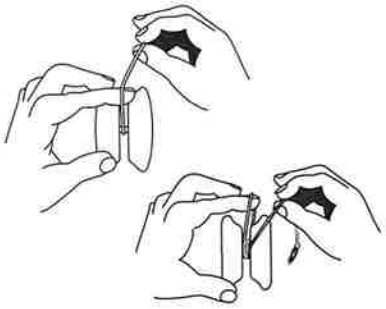
STRING



Common Questions

For related videos and downloads visit www.NEDkids.com

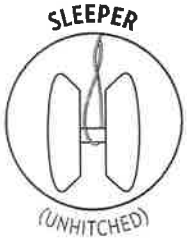
How do I wind up the string when it keeps slipping?
Wrap the string over your finger once. Then continue to wrap the string around the axle, to the side of your finger, 2-3 times.
Simply remove your finger and gently finish winding up the string. The finger loop will disappear when you throw the yo-yo down.



Can a ball bearing yo-yo be set for easy play?
The Ball Bearing yo can be hitched for easy play, as well as unhitched for advanced tricks. It will take five wraps to make it stop 'sleeping' completely, for easier tricks. See the "How to add the hitch for beginner tricks" instructions in the section below.

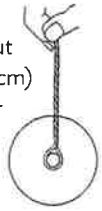
Adding wraps to make a hitch (for easy play)

The Ball Bearing Yo comes as a sleeper



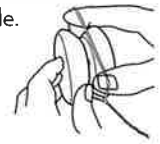
1-2 wraps

1. Pinch the string about 3 inches (7cm) above your yo.



2. As you look down at your yo-yo, spin it counterclockwise until the strands of string split apart.

3. Add one wrap at a time until there are five wraps around the axle.



4. Let go of the pinched string, and the yo-yo will spin, returning the string to its natural position. Now you are ready for easy play!

5 wraps

Is your string too long?

1. Measure the String

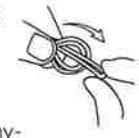
Let the string out and set the yo-yo on the ground.

Pinch the string at your elbow and let the top part drop. Slide your other finger down two inches.

2. Make a Solid Loop

Tie a new knot by wrapping the string around your fingernail and pinching it with your thumb, just like tying a balloon. Slide it off your finger.

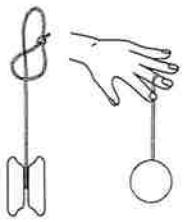
Slip the end underneath and pull it through to form a penny-sized loop.



Pull the knot tight and cut off the extra string.

3. Make a Slip Loop

This loop will fit any size finger, so the yo-yo doesn't fall off your hand.



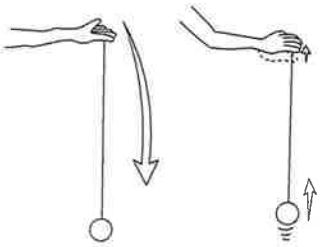
The Specialty yos need five wraps around the axle to do the first three tricks (See back) - Super Spinner yos need to be thrown 'softly' to do these 3 tricks.

1 Gravity Gripper

1. Place the yo-yo in your hand with your palm up. Make sure the string wraps over the top of your yo-yo.

2. Make a muscle, curl your wrist and fling your arm straight out in front of you.

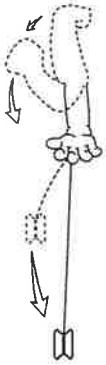
3. Release the yo-yo with a hard downward throw. Turn your palm over, and catch the yo-yo. **Good job!**



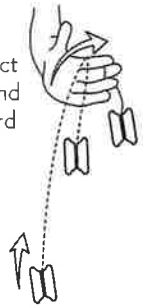
NED TIP *Is your yo-yo not coming up, but ends up spinning on its side? Line your shoulder, elbow and wrist straight out in front of you before your hard downward throw.*

2 Flip Flop

1. Release the yo-yo downward, like you would with the Gravity Gripper.

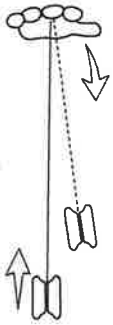


2. As the yo-yo comes up, direct it over your hand and back toward the floor.



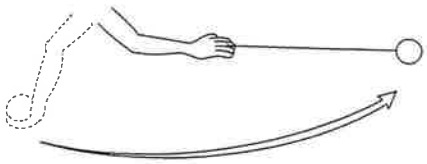
3. As the yo-yo flops back down let it do a second Gravity Gripper.

Congratulations! You've just done the Flip-Flop!



3 Forward Pass

1. Start with the yo-yo in your palm like you would for a Gravity Gripper. Now let your arms hang to your side, and draw your yo-yo hand back... ready to swing it quickly forward.



2. Let go of your yo-yo while it's behind you, and at the same instant, thrust your arm and hand forward in a swinging motion, leading with the back of your hand.

3. As the yo-yo comes back, turn your palm up to catch it. Nice job on the Forward Pass!
